

CLASSIFICAZIONE PER COLORE

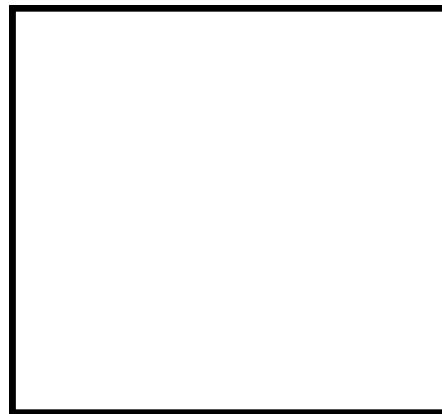

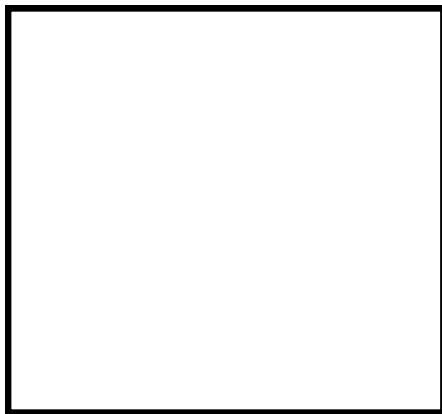

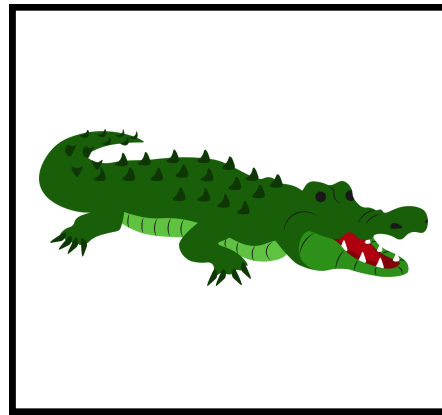

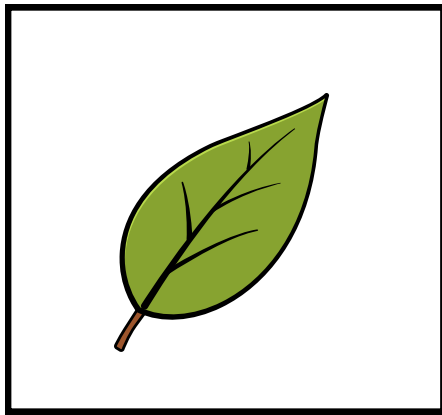

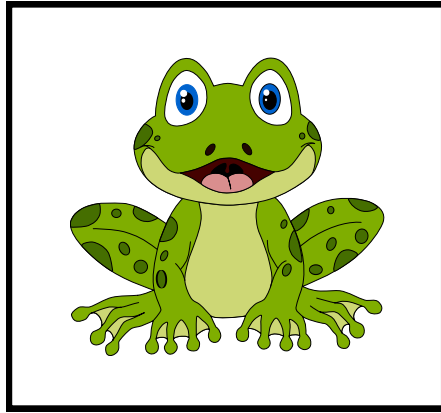

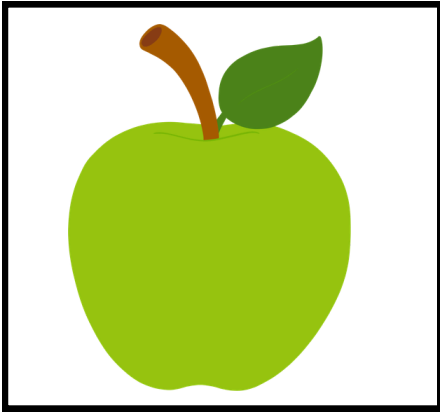

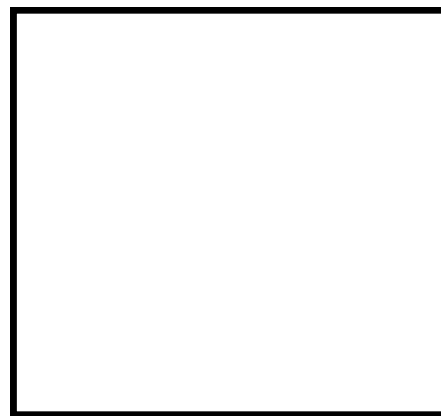

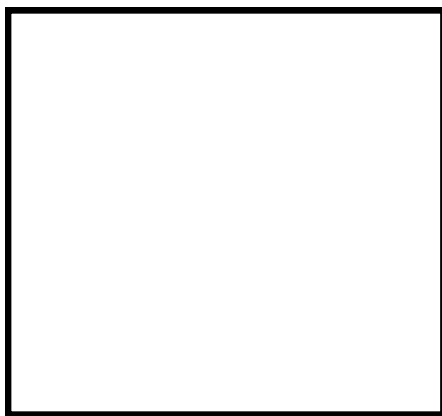

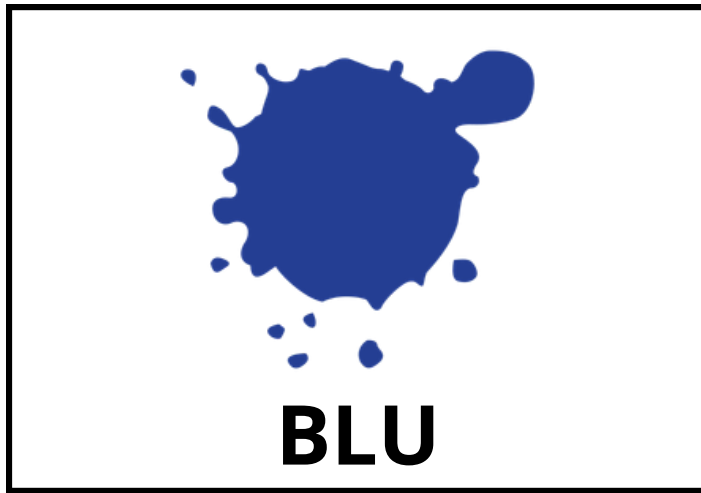

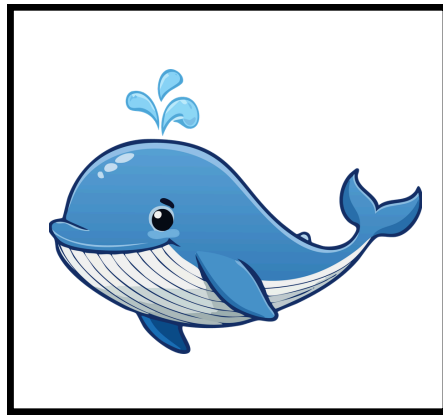

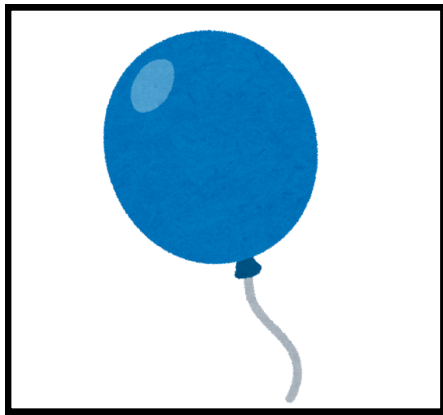

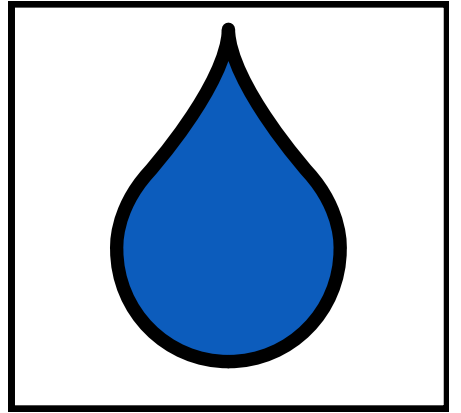

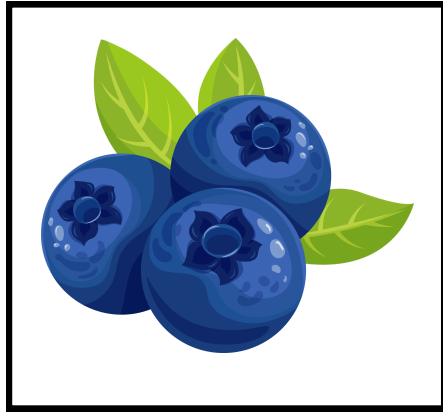

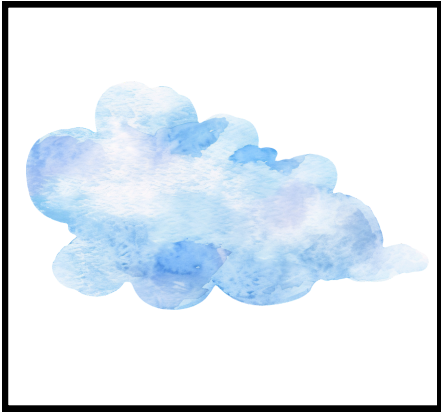

ISTRUZIONI

LL'attività di ***classificazione per colore*** viene proposta per aiutare il bambino a riconoscere i colori e a organizzare gli oggetti in base a una caratteristica visiva precisa.

È utile anche per ampliare il vocabolario, perché il bambino impara e utilizza i nomi dei colori e delle immagini presentate.

Quando viene utilizzata?

Si utilizza quando il bambino sta acquisendo o consolidando il riconoscimento dei colori, oppure quando presenta difficoltà nella discriminazione visiva e nella classificazione.

Come viene utilizzata?

Al bambino vengono presentate immagini o oggetti di uso comune.

La richiesta è di riconoscere l'oggetto, individuarne il colore e collocarlo nella categoria corretta (ad esempio rosso, giallo, blu, ecc.).

ISTRUZIONI

Durante l'attività l'adulto può nominare insieme al bambino l'oggetto e il colore ("mela rossa", "macchina blu"), favorendo così l'arricchimento del linguaggio e l'apprendimento di nuove parole.

Nota pratica

Un consiglio utile è plastificare i fogli e applicare velcro adesivo. In questo modo l'attività non si rovinerà, durerà più a lungo e potrà essere riutilizzata più volte, rendendo il materiale più resistente e funzionale anche nel tempo.
